

Unusual Edibles and Perennial Vegetables – February 1, 2018

Our guest speaker for the February monthly meeting was ***Telsing Andrews*** who spoke to the group about the various perennials that we all grow in our garden that are, in fact, edible.

The list is endless, and notes were not taken to record the many varieties. However, Telsing recommended that we check out "***Around The World in 80 Plants***" by Stephen Barstow.
